

NEW EXPANDED NEWBORN SCREENING FOR FLORIDA FAMILIES

Sunshine Genetics is an **optional research program** that uses advanced genetic testing to screen for ~**900** genetic conditions aimed at helping Florida babies live healthier lives.

EARLY DETECTION MATTERS

In the case of a rare disease, early information may help families and doctors make healthcare decisions sooner.

PARTICIPATION IS EASY & FREE

This program is available in addition to the standard newborn screening, which checks for 60 conditions, offered to all Florida newborns.

NO ADDITIONAL SAMPLE NEEDED

Sunshine Genetics uses a small portion of the blood already collected in your baby's routine newborn screening.

YOU MAY BE ELIGIBLE IF:

- ✓ You are pregnant or have a baby $\leq$ 30 days old
- ✓ Your baby is born and residing in Florida
- ✓ A parent/legal guardian over the age of 18 provides consent

Ready to Learn More?

If your newborn is eligible, you can take part in Sunshine Genetics to access early screening and contribute to important research.
